

**Film projection:
"Hotspots Revisited"**

12h10-14h00

04 September 2008

Meeting room 3, International Environment House I,

Hotspots, a film directed by Michael Tobias, will be shown for the first time in Europe.

Based on the book "Hotspots Revisited" by Russell Mittermeier, the feature film documentary examines some of the world's 35 hotspots, regions that have been identified by scientist as being particularly rich in species.

The film follows Russell Mittermeier, who is the Chair of IUCN's Primate Specialist Group and President of Conservation International, to locations including Madagascar, Brazil, Peru, and New Zealand.

The film reveals numerous primates, birds, rodents, bats, insects, reptiles, amphibians, unique plants and human cultural artifacts, some of which have never been filmed before. Several new species are recorded on film for the first time.

IUCN The World Conservation Union and the Geneva Environment Network have the pleasure of inviting you to attend a showing of the film Based on the book "Hotspots Revisited" by Russell Mittermeier ".

12:10- "introduction of the film by Mr Tobias
