South Bay Bird Society and West Valley Bird Society Present:

Advanced Screening

“Hotspots”

Benefiting Conservation

Parrots International

Indonesian Parrot Project

Ventana Wildlife Society California Condor Reintroduction

The mission of South Bay Bird Society and West Valley Bird Society is to provide educational related topics on all aspects of avian care. We are committed to study all avian species, their habitats and promote the preservation of endangered species. This commitment is extended to our hosting a special advanced screening of the eco-documentary, “*Hotspots*,” July 13th, 2008.

South Bay and West Valley chose three non-profit organizations that are in hotspot areas to become beneficiaries of this advanced screening: Indonesian Parrot project - Parrots International and Ventana Wildlife Society California Condor Reintroduction.

Do not miss your opportunity to support this benefit by joining us July 13, 2008 at the Hermosa Beach Playhouse. Meet filmmakers, Michael Tobias and Jane Gray Morrison of Dancing Star Foundation, as well as Mark Stafford of Parrots International. Also present will be Dr. Stewart Metz and Bonnie Zimmerman of Indonesian Parrot Project and Kelly Sorenson, Director of Ventana Wildlife Society.

Everyone is welcome. For more information - tickets and donations visit www.sobaybirdsoc.org or call 1-800- 516-9307

We thank you for your support.
