## Hotspots: A Stunning New Documentary

**Hotspots** is a new documentary produced by the [Dancing Star Foundation](#).

In Geeklish, a hotspot is a location that provides public Wi-Fi access. But talk with an ecologist, and you'll discover that a hotspot is a geographical location containing an immense diversity of animals, birds, or plants. The key to saving our planet is to protect and preserve these environmental hotspots.

The new film documents the latest and best efforts to save these
